

# G-20 World Summit Riots!

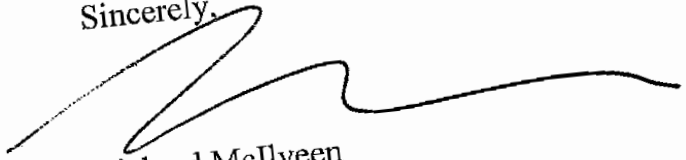

Wednesday, June 30, 2010

Dear Anthony,

A couple of weeks ago, as the G20 loomed on the horizon in Toronto, you called me with a predictive concern, telling me that you saw a 'wall of yellow fire' associated with the G20 weekend and that it was going to happen in Toronto's downtown core. You went on to say you didn't know how big this would be or what kind of damage might be associated with the image, but you asked me to take note of your prediction. I have asked you many times over the past 20 years to make your annual New Year's predictions on CTV News, Toronto but this one of those few times that you actually called and asked me to make note of one of your 'future flashes' for a very specific event.

As the G20 weekend progressed, and with the focus shifting from the leaders to the massive and a times, violent protests in Toronto, I was very surprised to see, that in the wake of the weekend, the 'iconic' image we are left with is burning police cars... which indeed presented a very memorable 'wall of yellow fire' to the many cameras that recorded those images. I was of course relieved that the 'wall of fire' was property damage only and there was no loss of life, but it was certainly an image that filled TV screens as millions of Canadians sat glued to their televisions watching the coverage.

Sincerely,

  
Richard McIlveen

Anthony,

You were right again; you told me all about "the wall of bright yellow fire" and the G-20 Riots in downtown Toronto, at least two weeks before it happened; it turned out the wall of bright yellow fire were the police cruisers the mob had set ablaze! Good stuff, Tony.

All the best, Les.
