# ROYAL FORTUNES

**What does fate have in store for Kate and William? Goodnews and (mostly) bad seer says**

This is a fairy-tale marriage made in hell. So says Anthony Carr, the World's Most Documented Psychic. He's one of three wise seers who regularly advise me on affairs of state. "It's pretty gloomy looking, I gotta tell you," says Carr, gloomily. Well, it's their wedding day, Tony, so, like the song goes, break it to me gently. "Okay but remember, I'm the psychic who got drunk with Lady Iris Mountbatten and warned her she only had six months left on Earth. And she died six months later (in 1982)." Duly noted.

That was then. What about now for William and Kate? "I see great danger. Fire! Fire! Fire! Around them and around Queen Elizabeth." That doesn't sound good. "And from a picture of his hand, I got that he's going to be a bit of a womanizer. Frankly, I think

they'll have trouble hanging on to Britain. I get the message that William will be the last king of England."

Good news, please. It's a special day. How about Ms. Middleton's future as a style star? "Women the world over will watch her and her, dresses and hats will be copied." Even more, says Carr, "she'll design her, own clothing line and become all the rage among fashionistas." And now for the biggie. Carr sees three kids, though Tony thinks one won't survive.

Other prophecies: "William will give up the throne for love (like Edward VIII in *The King's Speech*)." "I see a nervous breakdown."

\* Paul Bannister, GLOBE 06/12/02

**GLOBE**

1. Danger, wrecked romances and a glittering but short life await the heir to England's throne, says GLOBE palmist Anthony Carr, who's known in his native Canada as the 21<sup>st</sup> Century Nostradamus.
2. "Princess Diana's son, William, has just begun his 21<sup>st</sup> year, but already he has his whole life and character mapped out in the palm of his hand," asserts Carr.
3. Among the highlights: In an uncanny repeat of the Duke of Windsor's life, William will give up the throne for love.
4. He'll suffer nervous breakdowns, ruined health and early death.
5. Great dangers will surround him, from water, snow, assassins, and finally – fire! And Carr can describe the vehicle prominent in one attack.
6. He'll oversee the end of the royals as rulers, and hasten the collapse of the monarchy. "There's an M in his hand who will be his great love at age 26, but within two years they will part, reunite and he'll marry; then a divorce that will break his blue-blood heart. William's reckless handling of the romance will begin the end of the monarchy.
9. "There's a lot of danger in William's life line, too.
10. "He's also in great danger from high mountains and snow and fire! – Perhaps an avalanche – and from a sailing accident that will take a friend's life.
11. "The greatest danger to William will be from an assassin. I see blood on a classic car with wire-spoked wheels. The car is beige with burgundy trim and it will figure prominently in an attack. But fire! – fire! – fire! – is what I see around him, engulfing him – and her!" "I don't know if the prince will be driving it, or if an assassin will use it.
12. "He'll battle drink and drugs and earn a reputation as a playboy. The still-handsome prince will soon stop enjoying robust health and will die on foreign soil before or around his 40<sup>th</sup> year. That's for sure!
13. "He will die on foreign soil, far from where he was born."
